PROFESSIONAL SUMMARY

Systems and Infrastructure Engineer with more than 15 years of industry experience. Specialized in site reliability, automation, and collaborative delivery of scalable platforms. Proven track record of designing, deploying, and maintaining reliable infrastructure across on-prem, cloud, and hybrid environments. Proficient in Linux, Windows, and macOS, automation and Infrastructure-as-Code (Ansible, Terraform), containerization (Docker, Kubernetes), CI/CD, and monitoring with Grafana and Dynatrace.

TECHNICAL SKILLS

Languages & Scripting • Python, Bash, PowerShell, Go, SQL, JavaScript/Node.js, HTML/CSS.

Infrastructure & Cloud • AWS, Azure, Linux (Debian/RedHat), Windows Server, macOS, Docker, Kubernetes, Terraform, Ansible.

Observability & Tools • Grafana, Dynatrace, Uptime Kuma, Git, Jira, Jenkins, Jamf Pro.

Core Competencies • Disaster Recovery (DR), Root Cause Analysis, CI/CD, Network Administration (DNS/DHCP/VLANs), Agile/Scrum.

PROFESSIONAL EXPERIENCE

Edward Jones • St. Louis, MO (Remote)

Engineer III • November 2022 - Present

- **Infrastructure Automation & SRE:** Managed the configuration, tuning, and maintenance of complex enterprise infrastructure components.
- **Analyzed system health** to design enhancements for increased reliability.
- **Legacy System Recovery:** Designed and led a phased data-center failover exercise to revive disaster recovery processes for a business-critical system.
 - Reverse-engineered undocumented architecture across multiple data centers and OS environments (Linux, Windows).
 - Mapped dependencies between SQL databases and application servers to identify single points of failure.
 - Constructed and tested a failover plan involving sequential server migrations and database replication.
 - Developed PowerShell automation to streamline the failover process, significantly reducing recovery time objectives (RTO).
 - Authored comprehensive documentation aligning outdated processes with modern CI/CD principles, including automated rollback procedures.
 - Implemented a Grafana dashboard for real-time health checks and monitoring.
- **Incident Management:** Mobilized cross-functional teams (Network, Database, Security) to troubleshoot routing failures during load testing, utilizing log analysis via Splunk and realtime system monitoring via Dynatrace to resolve complex configuration issues.

The Purple Guys • Kansas City, KS

Field Systems Analyst II • March 2022 - August 2022

- Served as the technical point of escalation for peers regarding complex server, networking, and software issues.
- Implemented and maintained IT infrastructure for a diverse client base, managing Windows Server environments and firewall configurations.

University of Kansas • Lawrence, KS

Senior IT Support Technician • July 2018 - March 2022

- Managed workstation, server, and software lifecycles for university departments, including licensing, hardware repair, and inventory management.
- Led large-scale imaging and deployment projects, standardizing software delivery for faculty and staff.

BestMacs • Lawrence, KS

IT Specialist • May 2017 - July 2018

- Designed and supported IT systems for SMB clients, focusing on data backup & recovery and application deployment.

Apple, Inc. • Cupertino, CA (Remote)

Senior AppleCare Advisor, Mac+ • March 2012 - April 2017

- Advanced troubleshooting for iOS and macOS; analyzed diagnostic logs to identify root causes for hardware and software failures.
-

TECHNICAL PROJECTS

Self-Hosted Homelab & Cloud Infrastructure • Ongoing

- **Infrastructure:** Built and maintain a TrueNAS SCALE server using RAID-Z2 storage and VLAN isolation.
- **Containerization:** Deployed a customized, low-latency virtual tabletop instance and media stack via Docker.
- **Networking:** Configured Cloudflare Tunnels for secure remote access without exposing ports, managed DNS via Terraform.
- **Automation:** Developed a Python-based Discord bot to automate media requests via APIs and forward Prometheus/Uptime Kuma alerts to Discord with <1m latency.

Local Business Web Infrastructure Migration • 2026

- Migrated legacy hosting to modern static infrastructure using Hugo (Go) and Tailwind CSS; improved performance and site reliability.
 - Managed full domain transfer and DNS configuration; implemented professional domain-based email routing to replace generic provider services.
-

EDUCATION & CERTIFICATIONS

University of Kansas • Bachelor of Music • 2011

Certifications • Apple Certified Macintosh Technician, Apple Certified Support Professional, CompTIA IT Fundamentals+, Linux Essentials.
